EDUCATION & QUALIFICATIONS

Since 9/2017 Admission to M.D., The Chinese University of Hong Kong, Hong Kong.
2004-2009 Bachelor of Medicine and Bachelor of Surgery, MBBS,
The University of Hong Kong, Hong Kong,
1997-2004 Diocesan Boys' School, Hong Kong.

PROFESSIONAL EXPERIENCE

7/2022 – present **Associate Professor**, Department of Surgery, Faculty of Medicine, The Chinese University of Hong Kong.
7/2023 – present **Director of Robotic Services**, CUHK Medical Centre
4/2022 – present **Director of Urology Centre**, CUHK Medical Centre
7/2016 – 6/2022 **Assistant Professor**, Department of Surgery, Faculty of Medicine, The Chinese University of Hong Kong.
9/2022 – present **Warden**, the C.W. Chu College, The Chinese University of Hong Kong.
7/2022 – present **Med 4 Coordinator**, Junior Surgical Dressership, Department of Surgery, Faculty of Medicine, The Chinese University of Hong Kong.
4/2021 – present **Fellow**, Assembly of Fellows, C.W. Chu College, The Chinese University of Hong Kong.
11/2020 – present **Assistant Dean (External Affairs)**, Faculty of Medicine, The Chinese University of Hong Kong.
1/2017 – present **Teaching staff**, the C.W. Chu College, The Chinese University of Hong Kong.

- 9/2020 – present **Honorary overseas visiting consultant and teaching faculty**, Asian Institute of Nephrology and Urology, Hyderabad, India.
- 6/2018 – present **Honorary Resident (Specialist)**, Department of Surgery, Prince of Wales Hospital, Hong Kong.
- 7/2010 – 6/2016 **Medical officer**, Department of Surgery, Prince of Wales Hospital, Hong Kong.

PROFESSIONAL SOCIETY ACTIVITIES

- 6/2023 – present **Supporting editor**, European Urology Oncology.
- 5/2023 – present **Member**, SIU-PAUSA Working group, Societe Internationale d’Urologie.
- 11/2022 – present **Congress Organise Committee Chair**, Societe Internationale d’Urologie.
- 2/2021 – present **Member**, European Association of Urology Guidelines Office Dissemination Committee.
- 1/2021 – present **Convenor**, HKMJ Expert Advisory Panel on Social Media.
- 8/2020 – present **Member**, European Association of Urology Young Academic Urologists, Urothelial Cancer Working Party.
- 7/2020 – present **Social Media Co-Chair**, SIU Innovators, Societe Internationale d’Urologie.
- 7/2020 – present **Chair**, SIU Journal Social Media Committee.
- 5/2020 – present **Council Member**, Hong Kong Society of Transplantation.
- 2020 – 2022 **Member**, Committee on Promotion of Organ donation, HKSAR.
- 2021 – 2022 **Chair**, Young Fellows Chapter, Hong Kong Academy of Medicine.
- 2020 – 2021 **Vice-Chair**, Young Fellows Chapter, Hong Kong Academy of Medicine.
- 2019 – 2021 **Chairperson**, Younger Fellows Chapter, The College of Surgeons of Hong Kong.
- 2016 **Registered Specialist in Urology**, The Medical Council of Hong Kong.
- 2016 **Fellow**, the Royal College of Surgeons of Edinburgh, FRCSEd (Urol).
- 2016 **Fellow**, the College of Surgeons of Hong Kong, FCSHK.
- 2016 **Fellow**, the Hong Kong Academy of Medicine, FHKAM (Surgery).
- 2011 **Member**, the Royal College of Surgeons of Edinburgh, MRCSEd.
- 2011 **Member**, the Hong Kong Intercollegiate Board of Surgical Colleges, HKICBSC.
- 2009 **Registered medical practitioner**, The Medical Council of Hong Kong.

MAIN RESEARCH INTERESTS

I have special interest in uro-oncology and I have shaped my research profile to focus on bladder cancer and prostate cancer over the past few years. My research has a wide coverage including basic science laboratory work, artificial intelligence projects, cost-effectiveness studies and clinical trials. I always aim for high-quality studies that may yield impact and influence clinical practice.

1. Bladder Cancer

- En bloc resection of bladder tumour is a potentially superior technique in treating patients with non-muscle-invasive bladder cancer. I am currently leading a multi-centre randomized trial to evaluate the role of en bloc resection in patients with non-muscle-invasive bladder cancer (NCT02993211). This study was funded by the University Grant Council (General Research Fund and Early Career Scheme 2018-2019) and may potentially yield huge impact should it demonstrate any benefit in disease recurrence rate when compared to conventional transurethral resection of bladder tumour.
- I am conducting a phase 2 single-arm study on modified en bloc resection of bladder tumour, which attempts to extend the indication of en bloc resection to patients with large bladder tumours. It is a hybrid procedure composing of piecemeal resection of the exophytic part of the bladder tumour, followed by en bloc resection of the tumour base. By performing this maneuver, the tumour base specimen remains intact for a proper histological assessment, and complete resection of the tumour can be ensured.
- With growing interest worldwide, I led an expert consensus meeting on en bloc resection of bladder tumour. Collaborating with experts globally, we produced an expert consensus statement which can help standardize the en bloc resection approach. This has become an important reference for the development of en bloc resection in the future.
- With the foundation of the consensus statement, I am leading a global en bloc resection of bladder tumour registry. It is prospective observational study, aiming to recruit more than 2000 cases globally. So far, more than 100 centres have joined and we aim to answer clinical questions surrounding the topic of en bloc resection. It will also provide valuable insights regarding the feasibility and generalizability of en bloc resection in a real-world setting.
- I am currently the Asian national coordinator for the RESECT study under the leadership of BURST Urology. This will be the largest ever study evaluating the quality of TURBT globally. I am also a member of the EAU Young Academic Urologists – Urothelial Cancer Working group. I hope to establish strong connections between different centres globally.
- I believe that urine marker may play an important role for surveillance of bladder cancer recurrence after transurethral surgery. My group demonstrated that the use of urinary cell-free

DNA was able to yield excellent diagnostic performance, with an overall sensitivity of 93.5% and specificity of 95.8%.

- I am leading a project to develop computer-aided diagnostic systems for endoscopic and histological diagnosis of bladder cancer via deep learning method. This project was funded by the Innovation and Technology Fund.
- Our collaborative work with the National University of Singapore demonstrated that vitamin D receptor polymorphisms may predict the response towards intravesical BCG therapy in patients with bladder cancer. This may help us have better patient selection for intravesical BCG therapy.
- Hyperthermic intravesical chemotherapy is a potential adjunct treatment to reduce the risk of tumour seedling after transurethral resection. I am currently leading a pilot study investigating the safety and feasibility of hyperthermic intravesical chemotherapy immediately after transurethral resection of bladder tumour (NCT03689478).
- Intravesical Bacillus Calmette-Guerin therapy has been well proven to reduce disease recurrence rate of non-muscle-invasive bladder cancer. I am currently conducting a prospective longitudinal study investigating the change of microbiota within the urine environment along the BCG treatment course. I hope to discover the potential underlying mechanistic effect of BCG therapy which may translate to better immunotherapy in the future.
- Our centre advocates robot-assisted radical cystectomy with intracorporeal urinary diversion for patients with muscle-invasive bladder cancer. We have set up the Asian Robotic-Assisted Radical Cystectomy Consortium, which composes of more than 10 centres in Asia trying to collaborate on clinical studies related to robotic radical cystectomy. We are also in close collaboration with Intuitive Surgical, and we have performed a cadaveric study investigating the feasibility of robotic perineal cystectomy with intracorporeal urinary diversion using the robotic single-port surgical system.

2. Prostate cancer

- Prostate-specific antigen (PSA) is a common test used for prostate cancer detection, however, its diagnostic performance in the Asian population is unsatisfactory. We have conducted a number of studies on the use of Prostate Health Index (PHI) for prostate cancer detection. We demonstrated that the diagnostic performance of PHI is excellent in the Asian population and it has been implemented as a standard investigation in Hong Kong to determine the risk of prostate cancer and whether it is worthwhile to undergo prostate biopsy. We are also conducting a study to investigate the cost-effectiveness of PHI for prostate cancer detection, and this study was funded by the Health Medical and Research Fund (Research Fellowship Scheme).
- With the support from the S.K. Yee Medical Foundation, I helped introduce the MRI/USG

fusion biopsy platform to improve the diagnostic accuracy of prostate biopsy at my centre. I also helped implement the transperineal approach over the conventional transrectal approach in order to reduce the risk of post-biopsy infection. Clinical data collection is currently underway.

- Androgen deprivation therapy may lead to adverse events including acute myocardial infarction, stroke, diabetes mellitus and osteoporotic fracture. I have conducted a number of clinical studies demonstrating the risks of androgen deprivation therapy in the Asian population.
- My clinical research demonstrated that the cardiovascular adverse events tend to occur even after a short duration of androgen deprivation therapy. I am conducting an animal study trying to unravel the potential dynamic adverse effects of androgen deprivation therapy on the blood vessels, which is also known as endothelial dysfunction. The underlying mechanism may help us understand more how we can prevent the adverse events of androgen deprivation therapy.
- Our centre is the first robotic training centre in Asia and we have trained more than 1000 robotic surgeons from different Asian countries. We have established ourselves as one of the leading robotic centres in Asia.
- We conducted a phase 1 clinical study on the safety and feasibility of robotic single-port surgical system in performing radical prostatectomy for patients with prostate cancer (NCT03010813). The clinical data was subsequently used for FDA submission, and the robotic single-port surgical system was granted FDA approval in 2018.
- We have conducted a cadaveric study trying to extend the indication of the robotic single-port surgical system. We demonstrated that robotic single-port Retzius-sparing radical prostatectomy is a feasible approach.
- We are in close collaboration with Intuitive Surgical, and we are conducting a clinical study evaluating the role of the Intuitive Surgical IRIS software, which is an augmented reality system to facilitate the console surgeon in performing robotic surgery.
- We have another collaborative study with the Johns Hopkins University, to develop and evaluate an augmented reality system to facilitate the operating assistant during the surgical procedure. This study was funded by Intuitive Surgical and is currently underway.

RESEARCH GRANTS

Total: 21 research grants (Total funding of >88.6 million HKD)

- **19 External competitive grants (Total funding of ~88.44 million HKD)**
- **2 Internal competitive grants (Total funding of ~181 thousand HKD)**

External Competitive Grants

1. Theme-based research scheme 2022/23 (Twelfth round)
Role: Co-Principal Investigator
Project title: Institute of Medical Intelligence and XR
Reference No.: T45-401/22-N
Amount granted: HKD 50,607,000 million
Project period: 1/1/2023 - 31/12/2027
2. General Research Fund and Early Career Scheme 2021-22
Role: Principal investigator
Project title: The Global En Bloc Resection of Bladder Tumour Registry
Reference No.: 14117421
Amount granted: HKD 1,136,432
Project period: 1st Jan 2022 to 31st December 2024
3. General Research Fund and Early Career Scheme 2021-22
Role: Co-investigator
Project title: A randomized controlled trial comparing magnetic resonance imaging (MRI)-targeted biopsy and extended transperineal systematic biopsy for detection of clinically significant prostate cancer
Role: Co-investigator
Reference No.: 14115321
Amount granted: HKD 1,162,247
Project period: 1st Jan 2022 to 31st December 2024
4. General Research Fund and Early Career Scheme 2021-22
Role: Co-investigator
Project title: Virtual/Augmented Reality Based Planning and Intraoperative Guidance for Precise Laparoscopic Cystectomy via Advanced Human-in-the-loop Image Segmentation, Visualization, and Registration Techniques

Reference No.: 15218521

Amount granted: HKD 838,393

Project period: 1st Jan 2022 to 31st December 2024

5. The Innovation and Technology Fund

Role: Co-investigator

Project title: An Automated Urine Cytopathology Reporting System via Advanced Deep Learning Models Driven by Both Data and Human Knowledge

Reference No.: ITS/180/20FP

Amount granted: \$2,585,279

Project period: 1 September 2021 – 31 August 2023

6. General Research Fund and Early Career Scheme 2020-21

Role: Principal investigator

Project title: Transurethral modified en bloc resection for large bladder tumours

Reference No.: 14120620

Amount granted: HKD 513,676

Time period: 1st January 2021 to 31st December 2022

7. Investigator-initiated clinical trial, research grant sponsored by Baxter

Role: Principal investigator

Project title: Hemopatch to prevent lymphatic leak after robotic prostatectomy and pelvic lymph node dissection: a randomized controlled trial

Project number: 7070359

Amount granted: HKD 532,818

Project period: 1st January 2020 to 30th April 2021.

8. Investigator-initiated clinical trial, research grant sponsored by Janssen

Role: Co-investigator

Project title: Patient preference of apalutamide versus enzalutamide in patients with recurrent or metastatic hormone-sensitive prostate cancer: An open-label, randomized, cross-over trial

Reference No.: TJ2014725

Amount granted: HKD 17,688,541.31

Project period: 1st July 2020 to 31st July 2023

9. Health Medical and Research Fund – Health Care and Promotion Scheme (May 2018)
Role: Principal Applicant
Project title: Encouraging online registration of passive positive donors through innovative, interactive and motivational social media interventions: The ‘Gift of Life’ Project.
Reference No.: 02180248
Amount granted: HKD 1,194,188
Time period: 1st June 2019 to 31st May 2021

10. General Research Fund and Early Career Scheme 2018-19
Role: Principal investigator
Project title: Transurethral en bloc versus standard resection of bladder tumour: a multi-centre randomized controlled trial (EB-StaR study)
Reference No.: 24116518
Amount granted: HKD 639,984
Time period: 1st January 2019 to 31st December 2021

11. General Research Fund 2018-19
Role: Co-investigator
Project title: Intra-operative MRI-guided robotic system for photothermal therapy of bladder cancer.
Reference No.: 17206818
Amount granted: HKD 632,421
Time period: 1st January 2019 to 31st December 2022

12. The Innovation and Technology Support Programme – Platform Research Project.
Role: Principal investigator
Project title: Computer-aided diagnostic systems for bladder cancer: from endoscopy to histology.
Reference No.: ITS/398/17FP
Amount granted: HKD 1,764,624.4
Time period: 1st July 2018 to 30th June 2020

13. The Innovation and Technology Fund
Role: Co-investigator
Project title: SurViTK: Development of a software toolkit for automated surgical video

analysis via advanced recurrent neural networks

Reference No.: ITS/319/17

Amount granted: HKD 1,399,780

Time period: 1st July 2018 to 31st December 2019

14. S.K. Yee Medical Foundation

Role: Principal applicant

Project title: Prostate cancer detection: from random biopsy to targeted biopsy

Reference No.: 2171235

Amount granted: HKD 2,980,000

Time period: 1st June 2018 to 31st May 2021

15. S.K. Yee Medical Foundation

Role: Co-applicant

Project title: Laser prostatectomy (photoselective vaporization of prostate) for old men with enlarged obstructing prostate and high surgical risks

Reference No. 2171233

Amount granted: HKD 800,000

Time period: 15th April 2018 to 14th April 2019

16. Innovation and Technology Support Programme, Tier 3. Innovation and Technology Fund.

Role: Co-investigator

Project title: Development of an Interactive Planning and Prediction System for Patient-Specific Precise Shock Wave Lithotripsy via Advanced Deep Learning and Physically-based Modeling Techniques

Reference No.: ITS/026/17

Amount granted: HKD 1,398,998

Time period: 1st January 2018 to 30th June 2019

17. Health Medical and Research Fund – Research Fellowship Scheme 2017/18

Role: Principal investigator

Project title: The cost-effectiveness of prostate health index for prostate cancer detection in Chinese men

Reference No.: 02160047

Amount granted: HKD 780,156

Time period: 1st September 2017 to 31st August 2019

18. Investigator-initiated clinical trial, research grant sponsored by Olympus Hong Kong and China Limited.

Role: Principal investigator

Project Title: Transurethral en bloc versus standard resection of bladder tumour: a multi-centre randomised controlled trial (EB-StaR study).

Amount granted: HKD 204,120

Time period: 1st April 2017 to 31st March 2020

19. General Research Fund 2017/18

Role: Co-investigator

Project title: Computer-assisted precise partial nephrectomy using advanced deep learning, visualization and physically-based modeling techniques

Reference No.: 15203517

Amount granted: HKD 1,578,880

Time period: 1st January 2018 to 31st December 2019

Internal Competitive Grants

1. Direct Grant. The Chinese University of Hong Kong

Role: Principal investigator

Project title: Global incidence and mortality trends of upper tract urothelial carcinoma

Reference No.: 2020.114

Amount granted: HKD 32,000.

Time period: 1st June 2021 to 31st May 2022

2. Direct Grant. The Chinese University of Hong Kong

Role: Principal investigator

Project title: The association of androgen deprivation therapy and endothelial dysfunction in a rat model.

Reference No.: 2016.110

Amount granted: HKD 149,620.

Time period: 1st June 2017 to 31st May 2018

15. Clinical trial sponsored by Merck Sharp & Dohme (Asia) Ltd

Role: Co-investigator

Title: Phase II Trial of Pembrolizumab (MK-3475) in Subjects with Metastatic Castration-Resistant Prostate Cancer (mCRPC) Previously Treated with Chemotherapy (KEYNOTE-199) (MD16471)

Amount granted: HKD 397,078

Time period: 1st September 2016 to 31st August 2019

AWARDS AND HONORS

Individual Awards

1. SIU Innovators Award 2021, Societe Internationale d'Urologie.
2. Ten Outstanding Young Persons Awardee 2021, JCI Hong Kong.
3. Innovation award, The Annual BJUI Social Media Awards 2019, BJU International (3/2019).
4. UAA-Youth Section Fellowship 2017. Urological Association of Asia.
5. Astellas Education Grant for Prostate Cancer Preceptorship 2015.
6. Asia representative for the 3rd International Forum on Frontiers in Urology 2014, nominee from the Urological Association of Asia.
7. S.H.Ho Urology Travelling Scholarship for Asian Young Urologist Section, CUHK Urology Symposium 2013.

Team Awards

1. New Territories East Cluster Urology Team, New Territories East Cluster Outstanding Team Award 2019.
2. New Territories East Cluster Urology Team, Hospital Authority Merit Team Award 2019.

Prizes in Research Projects / Presentations

1. Best Video Award 2nd Prize on “Robotic augmentation cystoplasty: 1-year outcome of the anterior and posterior approaches”, 38th European Association of Urology Congress.
2. Best oral presentation at the 4th Annual Conference of Asian Andrology Association, 30th March 2019, Zhengzhou, China.
JY Teoh. “The application of robotic single-port surgical system in urology”.
3. Best Poster Award of the “Bladder cancer and penile cancer” session.
JY Teoh et al. Recurrence-free survival after monopolar versus bipolar transurethral resection of bladder tumour: post-hoc analysis of a randomized controlled trial. Oral presentation at the 38th Congress of the Societe Internationale d'Urologie, 4th October 2018, Seoul, Korea.
4. Best Abstract Award, the 16th Urological Association of Asia 2018.
JY Teoh, PK Chiu, SY Yip, CH Yee, SY Li, CF Ng. The cost-effectiveness of prostate health index for prostate cancer detection in Chinese men.
5. Best Abstract Award in the Kidney Cancer Session, the 15th Urological Association of Asia 2017.
C Ng, J Wong, C Chan, C Cheng, W Chu, E Wong, J Teoh, C Yee, C Hou, A Ng. The use of Leibovich prognosis score for localized renal cell carcinoma: long-term oncological outcomes.

6. Best Poster Award in the “Insights into epidemiology and pathophysiology of LUTS” session, European Association of Urology Congress 2017.
Yee CH, Yip SY, Teoh JY, et al. The association between lower urinary tract symptoms and cardiovascular risk factors in men.
7. Second prize award for the Best of Best Abstracts Presentation, presented by the 14th Urological Association of Asia Congress 2016.
JY Teoh, et al. Androgen deprivation therapy and the risk of acute myocardial infarction in Chinese men with prostate cancer.
8. Finalist for the Best Original Research by Trainees (BORT) 2015, the Hong Kong Academy of Medicine.
JY Teoh, et al. Detrusor muscle sampling rate after monopolar versus bipolar transurethral resection of bladder tumour: a randomized controlled trial.
9. Merits in research project for the College of Surgeons of Hong Kong (2015).
JY Teoh, et al. The risk of acute myocardial infarction after gonadotropin-releasing hormone agonist and bilateral orchidectomy in Chinese men treated for prostate cancer.
10. Silver Medal for the Best Original Research by Trainees (BORT) 2014, the Hong Kong Academy of Medicine.
JY Teoh, et al. Androgen deprivation therapy and the risk of acute myocardial infarction in Chinese men with prostate cancer.
11. Distinction in research project for the College of Surgeons of Hong Kong (2015).
JY Teoh, et al. Androgen deprivation therapy, diabetes and poor physical performance status increase fracture risk in Chinese men treated for prostate cancer.
12. Best Oral Free Paper Award, HKUA 21st Annual Scientific Meeting 2015.
JY Teoh, et al. Androgen deprivation therapy and the risk of acute myocardial infarction in Chinese men with prostate cancer.
13. Poster prize award (Clinical Science) at the 10th Annual Meeting of the World Chinese Urological Society 2015.
JY Teoh, et al. The optimal prostate-specific antigen (PSA) and PSA density cut-off levels for Chinese men to consider transrectal ultrasound-guided prostate biopsy.
14. Best Research Award paper 2014, presented by the College of Surgeons of Hong Kong.
JY Teoh, et al. Risk of acute myocardial infarction after androgen deprivation therapy for prostate cancer in the Chinese population.
15. Distinction in research project for the College of Surgeons of Hong Kong (2014).
JY Teoh, et al. Risk of acute myocardial infarction after androgen deprivation therapy for prostate cancer in the Chinese population.

16. Merits in research project for the College of Surgeons of Hong Kong (2014).
JY Teoh, et al. Risk of ischemic stroke after androgen deprivation therapy for prostate cancer in the Chinese population.
17. Merits in research project for the College of Surgeons of Hong Kong (2014).
JY Teoh, et al. Economical impact of prostate health index in guiding the decision on transrectal ultrasound-guided prostate biopsy.
18. Merits in research project for the College of Surgeons of Hong Kong (2014).
JY Teoh, et al. Risk of cardiovascular thrombotic events after surgical castration versus gonadotropin-releasing hormone agonists for men with prostate cancer.
19. Bronze Medal for the Best Original Research by Trainees (BORT) 2014, the Hong Kong Academy of Medicine.
JY Teoh, et al. The optimal prostate-specific antigen (PSA) and PSA density cut-off levels for Chinese men to consider transrectal ultrasound-guided prostate biopsy.
20. Best Research Award paper 2013, presented by the College of Surgeons of Hong Kong.
JY Teoh, et al. Risk of new-onset diabetes after androgen deprivation therapy for prostate cancer in the Asian population.
21. Distinction in research project for the College of Surgeons of Hong Kong (2013).
JY Teoh, et al. Risk of new-onset diabetes after androgen deprivation therapy for prostate cancer in the Asian population.
22. Merits in research project for the College of Surgeons of Hong Kong (2013).
JY Teoh, et al. Understanding the relationship between time to PSA nadir and survival in metastatic prostate cancer following primary androgen deprivation therapy.
