

APPOINTMENTS/EMPLOYMENT

1980 - 1983	Assistant Professor, Washington University, St. Louis, MO
1980 - 1983	Attending Urologist, Barnes Hospital, St. Louis Children's Hospital, Jewish Hospital, St. Louis County Hospital, St. Louis, MO
1980 - 1983	Chief, Section of Urology, Veteran's Administration Hospital, St. Louis, MO
1983 - 1983	Associate Professor (Tenure), Washington University, St. Louis, MO
1983 - 1997	Professor and Chairman, Division of Urological and Transplantation Surgery, University of Massachusetts Medical Center, Worcester, MA
1986 - 1997	Professor, Department of Physiology, University of Massachusetts Medical Center, Worcester, MA
September 1997 – September 1999	Professor (Tenure), Case Western Reserve University, Cleveland, OH
September 1997 – April 2019	Chairman, Department of Urology, Henry Ford Hospital, Detroit, MI
September 1999 -	Clinical Professor, Department of Urology, Case Western Reserve University, Cleveland, OH
January 2001	Director, The Raj and Padma Vattikuti Distinguished Chair of Oncology
September, 2008 -	Clinical Professor, Department of Urology, Wayne State University, Detroit, MI
September, 2008 -	Professor, Department of Urology, University of Toledo, Toledo, OH
March 2008 – July 2011	Clinical Professor, New York University Medical Center, New York, NY
April 2019 – July 2021	Director Emeritus, Department of Urology, Henry Ford Hospital, Detroit, MI
July 2021- Present	Clinical Professor and Director of Strategy and Innovation, Dept of Urology, Mount Sinai Hospital, NY, NY

EDUCATION

Jul-Dec 1969	Undergraduate education (MBBS) (M.D.)	JIPMER, Pondicherry, Madras University, India
Jan-Dec 1971	Internship (Rotating)	JIPMER, Pondicherry, Madras University, India
Jan 1971 – December 1972	Resident, Surgery	JIPMER, Pondicherry, Madras University, India
Jan-June 1973	Internship, Surgery	Episcopal Hospital Philadelphia, Pennsylvania
July 1973 – June 1974	Resident, Surgery	Byrn Mawr, Hospital, Bryn Mawr, Pennsylvania
July 1974 – June 1980	Resident, Urology (Dr. Patrick C. Walsh MD)	Brady Urological Institute, Johns Hopkins Hospital, Baltimore, Maryland
July 1974 – June 1980	Post-doctoral fellow, Urology (Dr. Patrick C. Walsh MD)	Johns Hopkins School of Medicine, Baltimore, Maryland
July 1975 – June 1976	Research Fellow, Urology (Dr. Patrick C. Walsh MD)	Brady Urological Institute, Johns Hopkins Hospital, Baltimore, Maryland
July 1977 – June 1978	William Wallace Scott Fellow, Physiological chemistry (Dr. Albert Lehinger, Ph.D),	Department of Physiological Chemistry, The Johns Hopkins University, Baltimore, Maryland
July 1983	Fellow, American College of Surgeons	

CERTIFICATION

American Board of Urology (1982)

Michigan State Medical Society (1998)

LICENSURE

Michigan: #4301071161 since August 5, 1997.

Massachusetts #51667 since October 1983

New York #232931-1 since June 22, 2004

Florida #ME106319 since February 2010

HONORS/AWARDS

1963 - 1964	Merit Scholarship, Kerala University
1964 - 1969	National Merit Scholarship, Government of India
1980	Resident Essay Contest, New England Section of American Urological Association
1981	Resident Essay Contest, New England Section of American Urological Association
1981	Grayson Carroll Essay Contest, American Urological Association
1990	Gold Cystoscope Award, American Urological Association
1990	Grayson Carroll Essay Award, American Urological Association
1992	Grayson Carroll Essay Award, American Urological Association
1993	Sushruta Award, Indian American Urological Association
1998	Kidney Care Lifetime Achievement Award, Sanjay Gandhi Postgraduate Institute of Medical Sciences
2003	Ambrose Reed Socioeconomic Essay Award, American Urological Association
2008	Dr. B.C. Roy National Award (Eminent Medical Person), Government of India
2010	Sushruta Award, Council of Medical Affairs, Association of Indians in America, Inc
2013	Most Distinguished Physician Award, American Association of Physicians of Indian Origin
2014	Hugh Hampton Young Award, American Urological Association
2016	Keyes Medal Award, American Association of GU Surgeons
2017	Menon Award, Endourological Society and Society of Urological Robotic Surgery
2017	Johns Hopkins Society of Scholars, Johns Hopkins University
2017 - 2036	Many Voices, One Nation, Smithsonian National Museum of American History
2021	St Paul's Medal, British Association of Urological Surgeons

OTHER PROFESSIONAL ROLES

1980 -	Member, Johns Hopkins Medical and Surgical Association
1980-1983	Ad Hoc Reviewer, Veteran Administration research Grants
1981 - 1990	Member, American Society of Clinical Investigation
1983 -	Member, American Association for the Advancement of Science
1983 -	Member, Association of Indian Urologists in North American
1983 -	Member, Massachusetts Medical Society
1983 -	Member, American Medical Association
1983 -	Member, Justin Cordonnier Society, Washington University in St. Louis
1983 -	Fellow, American College of Surgeons
1983 - 1990	Member, American Federation of Clinical Research
1984 - 1997	Member, Massachusetts Society for Medical Research
1984 - 1997	Member, American Urological Association, New England Section
1985 -	Member, American Urological Association
1986 - 1987	President, Researchers on Calculus Kinetics
1986 - 1992	Member, Scientific Council, University of Massachusetts Medical Center
1987 -	Member, Society of University Urologists

1987 - 1987	NIH Consultant, Government of India on Renal Stone Disease
1987 - 1988	Coordinator for Educational Programs, Local Arrangements Committee, American Urological Association, Boston
1987 - 1988	Consultant, Educational Council, American Urological Association
1987 – 1990	Ad Hoc Reviewer, GM2 Study Section - NIH
1988 – 1988	Member, Special Study Section, AIDS in the Kidney and GU Tract
1988 - 1989	Editor, Urology Research and Treatment
1988-1994	Editor, Urological Survey
1990 -	Member, Society of Basic Urological Research
1990 - 2000	Member, Urologic Society for Transplantation and Vascular Surgery
1991 -	Member, Societe Internationale d'Urologie
1991 - 1997	Member, American Association of Clinical Anatomists
1992-2004	Editor, Indian Journal of Urology
1992 – 2008	Associate Editor, Urological Research (Urolithiasis)
1993 -	Member, American Association of GU Surgeons
1996– 2004	Editor, Investigative Urology
1997 -	Member, Michigan Urological Association
1998 -	Member, American Urological Association, North Central Section
2003 -	Member, Clinical Society of GU Surgeons

RESEARCH PROFILE

Dr. Menon is an internationally recognized thought leader and innovator in the field of urology for his pioneering work in robotic surgery. He is credited with having performed the first robotic radical prostatectomy procedure in the United States. He has gone on to refine this surgical procedure through rigorous analysis of patient outcomes and by conducting four separate randomized trials. As a result of his work, robotic radical prostatectomy is now considered the world over as the standard of care for the surgical management of localized prostate cancer. Dr. Menon is also lauded as a surgical innovator for his work adopting robotics for multiple other urologic surgeries, including partial nephrectomy, radical cystectomy, radical nephrectomy with tumor thrombectomy, and renal transplantation. At Henry Ford, the Vattikuti Center for Outcomes Analytics, and Evaluation (VCORE) led by him was founded in 2010 and has since been the hub of training for post-doctoral research fellows from around the world. The research work from this group has been extensively published in high impact journals. The research activities of VCORE have also involved collaboration with the Harvard Medical School and the Brigham and Women's hospital at Boston. This collaboration has produced quality outcomes research in urology and health services research. His work has been recognized through some of the highest honors in the field of urology such as the Gold Cystoscope Award, the Hugh Hampton Young Award, and the Keyes Medal. He has published over 1000 manuscripts, book chapters and abstracts, primarily in the field of Robotic surgery, kidney transplantation, and urolithiasis

CLINICAL PROFILE

Dr. Menon is the Rajendra and Padma Vattikuti Chair in Urologic Oncology at Henry Ford Health System. He graduated from JIPMER, Pondicherry in India and completed his residency at the Brady Urological Institute at the Johns Hopkins Hospital in 1980. In 1997, Menon became Chairman of the Department of Urology at Henry Ford Hospital. At Henry Ford, he started incorporating computer-integrated surgical systems into clinical practice and established the first cancer-oriented robotics program in the world. This program has been the hub of clinical innovation in robotic surgery including the Vattikuti Urology Institute prostatectomy, the "veil" nerve sparing technique, use of suprapubic tube during robotic prostatectomy, the posterior approach to Vattikuti Institute Prostatectomy, the development of robotic kidney transplantation with regional hypothermia, and the precision prostatectomy (Menon) for prostate cancer. Since 2013, the Vattikuti Urology Institute technique of Robotic Kidney Transplant has been successfully adopted at multiple institutions across the world. He is currently in the process of setting up a formal clinical trial for the precision prostatectomy approach that promises improved functional outcomes while maintaining oncological outcomes in patients with prostate cancer who require surgery. Techniques developed by Menon have revolutionized the field of urological oncology and laid the framework for the extension of robotics to other surgical disciplines.

OVERALL IMPACT

For millennia, conventional surgical instruments were limited to handheld tools. Even the most masterful surgeons relied upon large incisions, yielding immense post-operative pain and disfiguring cosmesis; outcomes were largely focused on survival, as functional and quality-of-life measures were relatively unprioritized.

This began to change with the introduction of minimal-access surgery or laparoscopy. In 1990, Ralph Clayman developed techniques for laparoscopic kidney removal for cancer and subsequently kidney donation. However, the technique failed to gain a significant foothold in urologic practice. Two decades after its implementation, <1% of urologic cancers were treated with minimally-invasive surgery.

This started to change in 2000, when Mani Menon introduced the first computer-integrated surgical systems in urologic surgery (popularly known as "robotic surgery") for treating patients with prostate cancer. In robotic surgery, the surgeon benefits from magnified three-dimensional visualization, advanced instrument technology that yields enhanced dexterity and fine motor control, and superior ergonomics. The patient experiences less blood loss, smaller surgical incisions, decreased pain, and shorter convalescence, while maintaining the same and often a better chance at cure. Importantly, magnified visualization enables the preservation of delicate nerves and vasculature that control sexual and urinary function, vital for patient quality of life and satisfaction.

Until the era of robotic surgery, quality of life outcomes was rarely emphasized or rigorously assessed; today, they are routinely measured and prioritized. Robotic prostatectomy is now a standard of care in treating prostate cancer, the most common cancer in men.

Crucial to the development of computer-integrated surgery was Menon's prioritization of patient safety. Surgical innovation has traditionally come at a price: many patients initially undergoing cardiac and transplant surgery died during the procedures' development. That did not occur with robotic prostate surgery, as Menon adopted rigorous patient safety monitoring and instituted an independently audited electronic database to systematically assess patient outcomes and satisfaction.

Menon's team developed robotic surgical approaches for bladder and kidney cancer and many reconstructive surgeries. Robotic surgery has also been utilized by other surgical specialties; in fact, it was Menon who was instrumental in developing robotic surgery for end-stage-renal-disease by developing a reproducible technique for cooling the transplanted kidney. Though in its infancy, over 900 patients have undergone successful living-donor related transplants, utilizing Menon's technique.

Menon's innovations are more than the invention of one or even several surgical procedures; many surgeons have done that. What is groundbreaking about Menon's work is that he changed how thousands of surgeons operate. He successfully married two completely different disciplines – traditional surgery and computer-assisted technology – to create a novel, visionary modality through which patients receive not only equivalent but better outcomes. Today, surgical robots exist in every major medical center in the U.S. and Europe. As of 2018, over five million patients have benefited from robotic surgery.

In summary, Dr. Menon's contributions have led to a revolution in urologic oncology, laying the framework for robotic surgery's extension to other surgical specialties. A remarkable surgeon-scientist, he has had the vision, wisdom and perseverance to safely advance the boundaries of medicine for the benefit of millions worldwide.

DIVERSITY AND INCLUSION IMPACT

Over the span of his career, Dr. Menon has mentored several residents, and post-doctoral fellows from all over the world and guided them towards successful careers in Urology in the United States and globally. Given his career pathway, he has been particularly motivated in infusing the urological workforce with diversity. His trainee profiles and the Department of Urology at Henry Ford Hospital are a strong reflection of his dedication to the principles of diversity and inclusion. The Vattikuti Center for Outcomes Analytics, and Evaluation (VCORE) led by him and founded in 2010 has been the hub of training for post-doctoral research fellows from the United States and abroad, including countries like India, Italy, France, and Germany. The research work from this lab has been extensively published in high impact journals. Additionally, he has been a visiting professor at over 50 institutions across the globe, where he has lectured, performed robotic surgery and trained hundreds of surgeons. Menon's team has been involved in the establishment of over 35 robotic surgery programs in Europe, Asia and the Americas.

MENTORING PROFILE

Dr. Menon has been involved in training and mentoring of medical students, residents, and fellows during his appointments in St. Louis County hospital Missouri, Washington University of St. Louis, University of Massachusetts medical center, Case Western Reserve University at Cleveland, University of Toledo, New York University Medical Center, and the Henry Ford Hospital. As the Chairman of the Vattikuti Urology Institute at Henry Ford, he has actively been involved in the residency and the fellowship program of the institute. He has trained more than 80 robotic surgeons at the Henry Ford Hospital, many of whom have established robotic surgery programs across the globe. Besides clinical teaching, he has led the Vattikuti Center for Outcomes Analytics, and Evaluation (VCORE) since its inception in 2010. Through this enterprise, he has mentored several residents and post-doctoral fellows from across the globe in producing quality outcomes research in urology and health services research.
